

## Geometry Honors Summer Assignment 2017

**To my Geometry students from the Class of 2021,**

Welcome to PMA! My name is Mrs. Frey, and I will be your Geometry teacher in the fall. I am looking forward to an exciting year together - I can't wait to get to know you!

Attached is a required summer assignment, which will be due on the first day of school in September. The goal of this packet is to keep your math skills sharp during a time when you are not in school. Therefore, it is important to work on the problems in this assignment **throughout the summer**; you will not reap the same benefits if you wait until the week before school starts to complete the packet.

Most of this packet contains review material from Algebra I. There may be some questions that are not familiar to you; do your best to try to figure them out. Be sure to circle the best answer choice for each question. You **MUST** also show your work; you may write your work directly on the packet, or attach additional pages with your worked out solutions. Please make sure your name is on all pages.

This packet will be collected on **Tuesday September 5, 2017**. It will be counted toward your 1st quarter grade. Late packets will be subjected to a penalty of 10 points per day; **no packets will be accepted after Friday September 8, 2017**.

If you have any questions and need to reach me over the summer, you can email me ([efrey@pmamethuen.org](mailto:efrey@pmamethuen.org)) - I will try to check in every 2-3 days and respond as soon as I can.

Best,  
~Mrs. Frey
